Continued

As **Applicant and Responsible Agent**, I understand that electrical power in being connected at this structure for the specific portions and purposes listed above and that before any other portions of the electrical system may be energized, it must be inspected and approved and failure to do so will result in the disconnection of the electrical power to this structure. I agree, as applicant and responsible agent to assume **All Liability** for any damage that may occur due to the electric power being connected or disconnected.

I understand that this structure **CANNOT BE OCCUPIED** until a certificate of occupancy is issued and such action constitutes a **MISDEAMEANOR** (NCGS 153A-363 and 160A-423).

I do hereby attest, by my signature below, that the above signatures are those persons authorized to grant permission for their respective systems to be energized.

Name of Responsible Agent: _____ Date: _____

Signature of Responsible Agent: _____ Date: _____

590.6(A)(2) Receptacle Outlets Existing or Installed as Permanent Wiring.

Ground-fault circuit-interrupter protection for personnel shall be provided for all 125-volt, single-phase, 15-, 20-, and 30-ampere receptacle outlets installed or existing as part of the permanent wiring of the building or structure and used for temporary electric power. Listed cord sets or devices incorporating listed ground-fault circuit-interrupter protection for personnel identified for portable use shall be permitted.
